FOUNDER

Shreeya's Vision

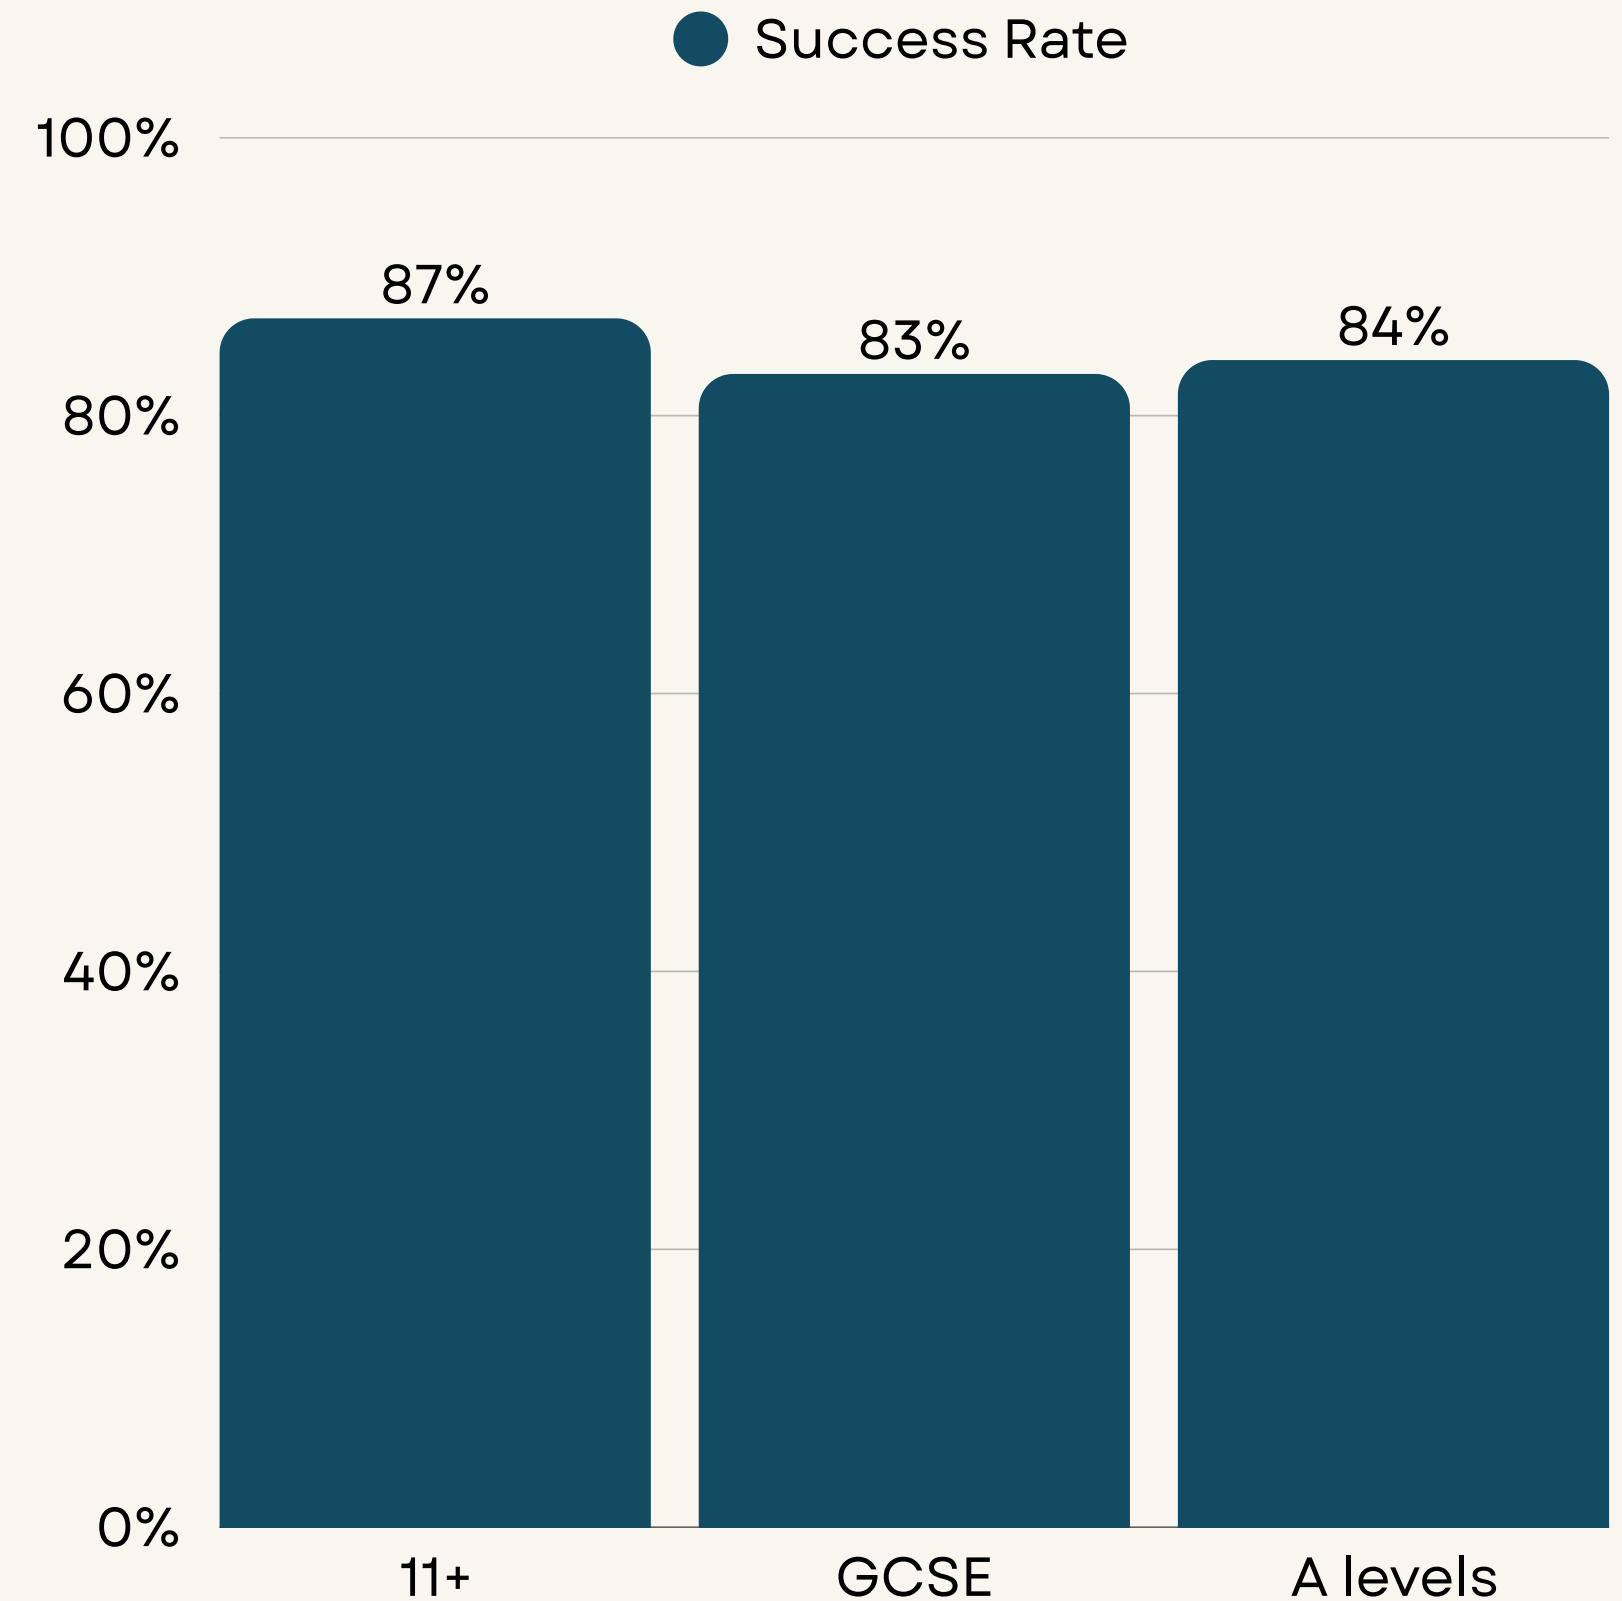

Shreeya founded SmartX Tutoring with the hope of reigniting a love for learning in the younger generation—sparking their curiosity in a way that not only boosts their grades but also builds their confidence.

While academics play a crucial role in shaping a child's future, traditional schooling often overlooks the importance of confidence, personal development, and communication. SmartX Tutoring bridges this gap by helping students thrive both academically and professionally.

Success Rates

Our success rates in helping students achieve their target grades.

Target grades are determined by students and parents, a target grade is a realistic target for a student given the time left till their exams and their current working at grades.
